1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-3 and 10, drawn to a semiconductor device, classified in class 257, subclass 396.
  - II. Claims, 4-9 drawn to a method of making a semiconductor device, classified in class 438, subclass 400.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions I and II, as above grouped, are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the device could be made by growing the semiconductor layer on a temporary substrate and transferring the crystalline semiconductor layer to an insulating substrate, thereby obviating the exposure of the substrate to the laser for crystallizing the semiconductor layer.
4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
